```
graph LR; A[Concactlterator::is_end] --> D[Sstlterator::is_valid]; B[Concactlterator::is_valid] --> D; C[Concactlterator::operator++] --> D;
```

The diagram illustrates a mapping or dependency from three source functions to a single target function. On the left, three white rectangular boxes are stacked vertically. Each box contains a function name. Blue arrows originate from the right side of each of these three boxes and point towards a single gray rectangular box on the right. The gray box also contains a function name. The arrows indicate that the three functions on the left are related to or perhaps call the function on the right.
